Nationality: Russian  
Date of birth: May 29, 2003 ( 22y )

## ABOUT ME

DevOps / Platform Engineer with 2+ years of experience in the fintech domain. Focused on infrastructure automation, development of platform services, and accelerating delivery pipelines. Implemented a DBaaS solution that reduced database provisioning time to 10 minutes, and developed reusable templates and base images to standardize and improve DevOps processes.

## PROFESSIONAL EXPERIENCE

1.  
Company: OTP Bank (Russia)  
Occupation: Senior Platform Engineer  
Data: November 2025 - present

### Main activities and responsibilities:

- Developed a DBaaS solution for OpenStack and VMware
- Reduced database provisioning time to 10 minutes, significantly accelerating service deployment and scalability

2.  
Company: OTP Bank (Russia)  
Occupation: Middle DevOps Engineer  
Data: March 2025 - October 2025

### Main activities and responsibilities:

- Supported DevOps processes and consulted internal teams on infrastructure and CI/CD practices.
- Maintained and developed cloud infrastructure in Yandex Cloud.
- Created base images and reusable TeamCity templates, standardizing CI/CD pipelines.

3.  
Company: Yustas  
Occupation: Junior DevOps Engineer  
Data: June 2024 - March 2025

### Main activities and responsibilities:

- Developed and maintained the company's internal infrastructure platform for use by multiple teams.
- Automated environments to improve consistency and usability for internal users.

4.  
Company: IT and Company  
Occupation: Junior Developer  
Data: September 2023 - April 2024

### Main activities and responsibilities:

- Participated in the development of software solutions.
- Built a strong engineering foundation that enabled a transition into DevOps and Platform Engineering.

## LANGUAGES

English - Full professional proficiency  
German - Limited professional proficiency  
Russian - Native

## EDUCATION

1.  
Organisation: Leonov Moscow Region University of Technology  
Qualification: Information Security Specialist  
Level: Bachelor University Degree ( 4 years )  
Data: September 2021 - July 2025

2.  
Organisation: School 21 (ex. Ecole 42)  
Description: P2P programming school by Sberbank  
Data: April 2023 - July 2025

3.  
Organisation: Moscow School of Programming  
Description: Educational project for teaching programming  
Data: September 2017 - July 2020

## SKILLS

### DevOps & Platform Engineering:

- Design and development of platform services (Infrastructure / Platform as a Service)
- Infrastructure and delivery process automation
- Support and evolution of DevOps practices within product teams
- Improvement of developer experience and environment standardization

### Infrastructure & Cloud:

- Yandex Cloud: infrastructure operation and maintenance
- OpenStack, VMware: work with virtualized infrastructure
- K8s and Docker: work with orchestration and containers
- Design and operation of highly available environments

### CI/CD:

- Building and maintaining CI/CD pipelines
- TeamCity/Gitlab CI: development of reusable templates and base configurations
- Standardization of build and delivery processes

### Automation & IaC:

- Automation of service and infrastructure deployment
- Development of templates, base images, and reusable components
- Pulumi/Terraform: Infrastructure as Code (IaC) approach
